Introducing Wrist Splints:

sutherlandmedical

Wrist Splints

Wrist Splints are ideal for providing support to the wrist and limiting movement in a post operative or post injury environment. Wrist Splints are suitable for use in treating joint pain, strains, repetitive strain injuries and post plaster cast removal.

Wrist Splints have a surgical steel palmer support that should be shaped prior to application to assist in providing a secure and comfortable fit.

The central strap allows effective wrist immobilisation.

Code	Size	Side	Wrist Measure
SM850	Small	Left	18 - 20cm
SM851	Small	Right	18 - 20cm
