

Camera Covers

The ultimate sterile barrier

A camera drape system that offers 100% true sterility where others fail. The adaptor drape's unique system allows safe, quick and easy application.

- Enclosed design provides 100% protection from unwanted deposits of organic build up inside inaccessible crevices of the camera coupler mechanisms, which need to be cleaned in order to comply with regulatory guidelines
- Fast, between cases, camera turn around times
- Reduces the need for expensive inventories of camera systems
- Allows non-dismantable camera system users to comply with standard AS4187 and TGA recommendations
- Latex Free
- Patented in the following countries: Australia (No.766143), Netherlands, France, Germany, Italy, Denmark (No.1006920) and the United States (No. 6375610).
- 100% Australian Made

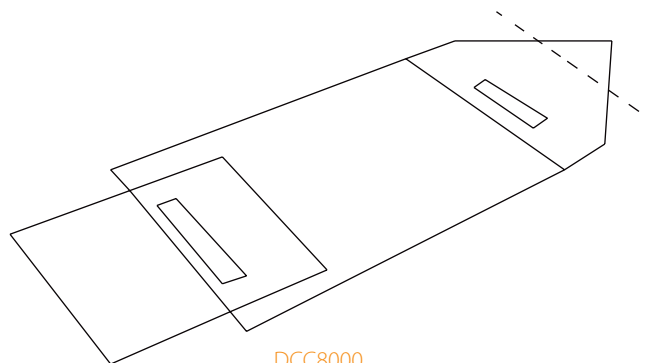

Sterile

DCC8007	Description
