

## High level of performance

Ancor Flexibles SPS invented the first 100% peel-off pouch in 1996. Since then, BOP® pouches and reels have become the most popular preformed Sterile Barrier Systems (NF EN ISO 11607-1) in the world, used in more than 85 countries. Ancor Flexibles SPS has always aimed to offer quality levels in accordance with the continuously rising standards in hospital sterilisation. BOP® offers users an effective microbial barrier while guaranteeing the effective flow of the sterilising agent and a peel-off system which provides aseptic conditions on opening.

Through medical paper especially developed to meet the requirements of steam sterilisation, BOP® has a 60 g/m<sup>2</sup> paper surface which is performance-equivalent in terms of resistance and barrier to 70g/m<sup>2</sup> paper.

A part from the ecological aspect concerning the volume of waste to be treated, the reinforced 60g/m<sup>2</sup> paper, combined with tear-proof "shatterless" film, offers flexible packaging and easy opening that are incomparable for this type of packaging.

This design completely changed traditional packaging methods (paper bags) and offered users aseptic conditions on opening which until then had been imperfect.

Ancor Flexibles SPS works with the best paper manufacturers in the sector and submits all papers and "barrier" material to stringent quality tests, endorsed by international standards such as ISO, EN and BS

- NF EN ISO 11607-1 and EN 868-5
- Medical grade 60g/m<sup>2</sup> paper + tear-proof shatterless film
- Double flow indicator (ISO 11140-1) intrafilm printed EO Steam and Gas
- Wide range of sizes in all formats (flat, gusset and self-adhesive)
- No curling on opening
- Excellent peel-off opening
- Peel-off direction printed on reels
- Reduction of noise on opening compared to traditional packaging

### Conformity

NF EN ISO 11607-1 and EN 868-2

### Flat pouches

Double indicator : steam + gas OE  
1 paper side / 1 film side
