

# **BioRush** Bio-Enzymatic Automatic Toilet Bowl Cleaner & Deodorizer

**Cleans, deodorises & freshens automatically  
with every flush!**

## **Features:**

- 100% biodegradable. Acid free, non-caustic and contains no harmful chemicals. Can be used with septic tanks.
- BioRush contains billions of bacteria that clean naturally.
- Easy to use, remove transparent wrapper and place in toilet cistern.
- BioRush lasts up to 1,200 flushes for an average of two months usage at home.

The bio-enzymatic action of this product keeps the toilet surface clean and fresh smelling all day. It eliminates toilet stains and odours, prevents build up of organic wastes in the toilet and keeps the drain system free flowing for an average of 2 months!

Cont.

Bio-enzymatic cleaners are cleaning products that use non-pathogenic, “good” bacteria to digest wastes, soils, stains and malodours. The bacteria do this by producing enzymes specifically designed to break down certain molecules (wastes/soils) into smaller pieces. These smaller pieces become “food” for the bacteria. The bacteria consume these soils and break them down into two basic compounds: carbon dioxide and water. The bacteria grow in number and continue to consume the soils until their food supply diminishes (the soil is gone), then the bacteria population levels off or decreases, and can be washed away during the next cleaning or continue to work against new soils.

It is important to know that the enzymes in these cleaners are not living things and cannot grow or reproduce on their own, like the bacterial micro-organisms do. They are more like tools that are created by the bacteria to help break down large molecules.

### **There are various benefits to using bio-enzymatic cleaners:**

1. They are often safer for the environment and human health compared to other chemical products.
2. The micro-organisms (bacteria) can penetrate into very small cracks and crevices and eliminate soils and malodours that traditional chemicals often cannot remove.

**Warning:** Keep out of reach of children, in case of contact with eyes, rinse with water and seek help with a doctor as soon as possible.
