

## Tourniquet Systems

Electric Tourniquets / Compressed Air Tourniquets / Manual Tourniquets  
Tourniquet Cuffs / Tourniquet Consumables / Pressure Infusion

Find our full range of products on [www.vbm-medical.de](http://www.vbm-medical.de)

Here you will find our media centre with additional information such as application videos, brochures, flyers etc.

**Disclaimer:**

This advertising material includes information of the complete VBM medical device product range.

Whether a medical device is available/ approved in your region must be inquired. Please contact your VBM customer service.

The medical devices in this catalogue are manufactured without the use of natural rubber latex, unless otherwise specified.

The medical devices in this catalogue do not contain phthalates which require labelling according to CLP Regulation (EC) 1272/2008.

# Tourniquet Touch TT20

With two cuff channels

For use with Single Cuff, Double Cuff for intravenous regional anaesthesia (IVRA) or two Single Cuffs for bilateral surgery.

## Features

**Touch Screen**

- 100% premium glass
- Easy cleaning and disinfection
- Usable with surgical gloves

**Display**

- 8 inch (800 x 480 pixel)
- Wide viewing angle (170°)
- Low reflection, mat, anti-glare

**Battery**

- Lithium ion (14.4 V - 93.6 Wh)
- Approx. 8 h backup runtime

**Housing**

- With integrated handle
- Very robust material
- Easy cleaning and disinfection

**USB-Port**

- Software updates
- Saving log file for device analysis

**Timer Alarm**

- Precise time monitoring during the procedure
- User is warned after reaching the set alarm time
- Extension of alarm time by 10, 20 or 30 minutes

**Fast Choice Buttons**

- Allow to change pressure and time of preset values with only two touches
- No need to tap arrows and confirmation buttons
- Facilitate immediate pressure changes during surgical procedures

**Settings**

- Defaults allow personalised presetting of time and pressure
- Easy maintenance (calibration, self test, leak test)

**Intravenous Regional Anaesthesia (IVRA)**

- Safety lockout to reduce the risk of accidental cuff deflation and to prevent a sudden loss of IVRA

## Order information

Tourniquet TT20 / With 3.0 m Coil Connecting Tubing (blue and red), 100 - 240 VAC, height 186 mm, width 263 mm, depth 226 mm, 4,5 kg

# Compressed Air Tourniquets

Compressed air – analogue pressure display – manual back-up system

## Tourniquet 2500

- Bloodless field

## Tourniquet 4500

- Bloodless field
- Intravenous regional anaesthesia (IVRA)

## Tourniquet 2x500

- Bloodless field
- Intravenous regional anaesthesia (IVRA)
- Bilateral surgery

### Features

#### Pressure Regulation

- Pneumatic precision pressure regulator
- Fast cuff inflation and deflation
- Regulator knob allows very precise regulation
- Limits pressure to max. 600 mmHg

#### Analogue Manometer

- No flickering during pressure settings
- Always shows the real pressure in the cuff
- Precision manometer

#### Manual Back-Up System

- Automatic change to manual system during failure of compressed air, no battery needed
- Maintenance free
- Can be used at any time even without compressed air

#### Colour coded Coil Connecting Tubing

- Firmly connected to the device
- With positive locking connectors

#### Manual Timer

- Countdown function with audible signal
- Timer function

#### Flush Button

- To check for bleeding
- For intermitted release of local anesthetic after Intravenous regional anaesthesia (IVRA)
- Allows deflation in manual mode

# / Manual Tourniquets

The Manual Tourniquets are manually operated tourniquets. They regulate the pressure of a Tourniquet Cuff which temporarily occludes the blood flow of a patient's upper or lower extremity in order to create a bloodless field.

## / Manual Tourniquet

Hand Inflator with manometer for the autonomous use without electricity and without central air

# Tourniquet Dispo Cuff

For single use

## Features

The Tourniquet Dispo Cuff is a sterile, single use product especially suitable for contaminated procedures, preventing against HAI (Hospital-acquired infection). The Dispo Cuff is available in straight shape (for small or midsize upper extremity) and contour shape (mainly for lower conical shaped extremity) and is provided in different sizes, which are colour coded for optimal cuff selection.

### Cuff-Design

- Large hook and loop fastener for reliable cuff fixation
- Colour coding makes size selection and ordering easier
- Tubing made of kink-resistant silicone material
- Low profile design and lightweight
- Contour and straight shape
- PVC-free

### Packaging

- Packed in dispenser box
- Colour coding makes size selection and ordering easier
- Easy storage due to low profile packaging

### Contour Shape

- Conical design with a smaller diameter distally than proximally when applied
- Occludes the blood flow at lower cuff pressures due to an improved fit to the extremity
- Integrated stiffener to prevent cuff migration

### Straight Shape

- Cylindrical design
- Does not show any difference in diameter between proximal and distal part

## Order information

# Tourniquet Wipe Cuff

For manual wipe disinfection

## Features

The Tourniquet Wipe Cuff is a reprocessable Tourniquet Cuff made of durable material, suitable for repeated use after wipe disinfection. The Wipe Cuff is available in straight shape (for small or midsize upper extremity) and contour shape (mainly for lower conical shaped extremity) and is provided in different sizes, which are colour coded for optimal cuff selection.

### Cuff-Design

- Large hook and loop fastener for reliable cuff fixation
- Colour coding makes size selection and ordering easier
- Tubing made of kink-resistant silicone material
- Low profile design and lightweight
- Contour and straight shape
- PVC-free

### Special Features

- Specific inner material dries quickly after wipe disinfection and allows timely reuse of the product
- UDI-Code for product traceability
- Serial number for tracking of product usage
- Reprocessable up to 100 times (wipe disinfection)

### Contour Shape

- Conical design with a smaller diameter distally than proximally when applied
- Occludes the blood flow at lower cuff pressures due to an improved fit to the extremity
- Integrated stiffener to prevent cuff migration

### Straight Shape

- Cylindrical design
- Does not show any difference in diameter between proximal and distal part

# Silicone Velcro Cuff

For automatic reprocessing

## Features

The Silicone Velcro Cuffs are top of the class when it comes to safe, reliable and economical solutions. The design and specifications allow the cuffs to withstand all types of reprocessing such as manual/wipe and automatic/thermal cleaning and disinfection. The Silicone Velcro Cuffs have also been validated for sterilization by steam autoclave at a temperature of 134 °C for 5 minutes.

### Cuff-Design

- Heavy duty manufacturing process for durability
- VBM solution of detachable silicone bladder, easy to wipe - easy to dry
- Tubing 86 cm long, made of kink-resistant silicone material
- Colour coding makes size selection and ordering easier
- PVC-free

### Contour Shape

- Conical design with a smaller diameter distally than proximally when applied
- Occludes the blood flow at lower cuff pressures due to an improved fit to the extremity
- Specific bladder design (wave pattern) to prevent cuff migration

### Straight Shape

- Cylindrical design
- Does not show any difference in diameter between proximal and distal part

# Classic Infusor

For pressure infusion, irrigation, transfusion and invasive blood pressure monitoring

### 500 ml and 1000 ml version

With double hook, for fixation of different fluid bag configurations.

- Rapid administration of an infusion solution for compensation of fluid/ volume deficiency
- Pressure monitoring and irrigation of the tubing system during invasive, arterial blood pressure monitoring
- Transfusion

### 3000 / 5000 ml version

With zipper, allows insertion of different fluid bag configurations.

- Administration of large fluid volumes for irrigation of the operation field

The polyamide material of the Classic Infusor enables easy cleaning & disinfection. Transparent netting for a clear view on the fluid bag and the fluid level. With UDI-Code for product traceability.

## Features

### Hand inflator with three-way stopcock

- Ergonomic hand inflator for inflation
- Three-way stopcock for quick deflation during change of the fluid bag

### Manometer

- Pressure range from 0 - 300 mmHg in increments of 10 mmHg
- Robust and durable for accurate pressure monitoring

### Colour coded pressure indicator

- 360° pressure indicator facilitates pressure monitoring
- Pressure relief valve to prevent over inflation

## Order information

# / Clear Infusor

For pressure infusion, irrigation, transfusion and invasive blood pressure monitoring

### 500 ml and 1000 ml version

- Rapid administration of an infusion solution for compensation of fluid/ volume deficiency
- Pressure monitoring and irrigation of the tubing system during invasive, arterial blood pressure monitoring
- Transfusion

### 3000 ml version

- Administration of large fluid volumes for irrigation of the operation field

Wrap-around design allows fixation of most fluid bag configurations and even pressure distribution. The smooth surface of the PU material enables easy cleaning & disinfection. The transparent material offers a clear 360° view on the fluid bag and fluid level. With UDI-Code for product traceability.

## Features

### Hand inflator with three-way stopcock

- Ergonomic hand inflator for inflation
- Three-way stopcock for quick deflation during change of the fluid bag

# Pressure Infusor 100 & 200

Automatic Pressure Infusors for compressed air

For the use with pressure infusion cuffs for automatic irrigation purposes during minimal invasive surgery.

Features

**Precision Pressure Regulator**

- Very precise pressure regulation
- Maintains selected pressure and guarantees automatic compensation
- Limits pressure to max. 300 mmHg

**Protection Cover**

- Protects the device from liquid and damage

**Coil Connecting Tubing**

- Firmly connected to the device
- With male Luer Lock connector

**Universal Clamp**

- Possibility of mounting on a horizontal standard rail or vertical pole
